How it works — 7-day eligibility.

DAY 0

First Deposit

Player registers + completes FTD. System auto-activates 7-day Red Angpao eligibility instantly. Notification sent.

DAY 1-6

Daily Angpao

Randomized Red Angpao distributed daily — value scales with the deposit tier. Distributed via daily login claim, randomized auto-credit, or daily betting activity reward.

DAY 7

Final Reward

Last Angpao drop closes the window. Rewards subject to 10× turnover before withdrawal. Eligible games: Slots, Fishing & eGames.

DAY 8+

Retention Stack

Player rolls into reload bonuses, VIP cashback, mission tasks, daily Angpao draws, referral campaigns and tournament invitations.

▸ EXAMPLE USER JOURNEY • ₱1,000 DEPOSIT

Player registers and deposits **₱1,000** successfully → 7-day Red Angpao eligibility auto-activates → randomized daily reward of **₱88–₱138** for 7 days → cumulative **₱616–₱966** Angpao on top of FTD. Player retention and gameplay engagement **increase significantly** through the window.

Newcomer Angpao — seven tiers.

Reward scales with first-deposit amount. Randomization inside each tier creates excitement and perceived value while keeping operational cost manageable.

FIRST DEPOSIT	DAILY ANGPAO RANGE	7-DAY REWARD RANGE	BONUS % EQUIVALENT	COST RISK
₱100 – ₱299	₱8 – ₱18	₱56 – ₱126	42% – 56%	Low Risk
₱300 – ₱499	₱20 – ₱28	₱140 – ₱196	39% – 47%	Low Risk
₱500 – ₱999	₱38 – ₱58	₱266 – ₱406	40% – 53%	Controlled
₱1,000 – ₱2,999	₱88 – ₱138	₱616 – ₱966	32% – 61%	Moderate
₱3,000 – ₱4,999	₱148 – ₱288	₱1,036 – ₱2,017	34% – 40%	Moderate
₱5,000 – ₱9,999	₱308 – ₱588	₱2,156 – ₱4,116	41% – 43%	High Value
₱10,000+	₱888	₱6,216	62%	Premium VIP

Why the 7-day model wins.

A flat one-time welcome bonus drops off in the first 72 hours. The Red Angpao 7-day eligibility system is intentionally engineered to keep players active longer and drive recurring deposit behavior — while randomization keeps subsidy cost predictable.

- **Longer player engagement** — daily reward triggers re-login for a full week, not one drop on registration
- **Better retention metrics** — players who reach day-3 are far more likely to convert into long-term actives
- **Higher deposit recurrence** — randomized reward range encourages players to deposit again within the window
- **More gameplay turnover** — 10× wagering requirement guarantees real activity behind every bonus
- **Increased profitability** — randomization keeps subsidy controlled while perceived value stays high
- **Reduced short-term bonus abuse** — turnover requirement + KYC + 1 IP / 1 device locks out farming
- **Better conversion into long-term active players** — by day-7 cohort has played 5+ sessions; sticks into reload

Profitable even at the low tier.

100 new players	avg deposit ₱300
Total deposits	₱30,000
Avg Angpao reward	₱25
Total bonus cost	₱2,500
Estimated GGR @ 25%	₱7,500
Estimated Net Margin	+₱5,000

- Margin holds even with rewards distributed — **net positive on cohort**
- **10× turnover** before withdrawal protects subsidy and forces real gameplay
- Randomized rewards **psychologically increase perceived value** while keeping subsidy controlled
- Higher tiers improve the ratio further as turnover scales with deposit size
- Cohort progresses into reload + VIP within 30 days — long-tail LTV uplift

▸ RESULT

Even with rewards distributed, the campaign remains **profitable** due to player gameplay turnover and retention. The model is intentionally designed to keep acquisition cost sustainable, prevent bonus abuse, and **improve cash flow immediately**.
